

RAHUL ROSHAN G

+91 96067 09743 ◇ Bangalore, Karnataka

rahulroshanganesh2002@gmail.com

CAREER OBJECTIVES

- Apply my knowledge to challenging projects, contributing innovative solutions while continuously learning from experienced professionals to enhance my skills.
- Contribute to the development of cutting-edge technologies and transformative solutions.
- Adapt to evolving technologies and continuously enhance my skill set to stay competitive in the ever-changing software industry.
- Leverage my technical expertise and problem-solving skills to develop efficient and scalable software solutions that drive business growth and innovation.

EXECUTIVE PROFILE

- Proficient in Java with a solid foundation in C and Python.
- Experienced in application development using Java and Python, web development with HTML and CSS, and database management with SQL.
- Strong understanding of software development principles, focusing on writing clean, efficient, and maintainable code.
- Hands-on experience with software development best practices, debugging, and optimizing applications for better performance.

EDUCATION

Bachelor of Technology - Computer Science and Engineering, 2020 - 2024
PES University, Bangalore, Karnataka
CGPA: 8.36

Pre-University - PCMB, 2017 - 2019
St. Joseph Indian Composite P U College, Bangalore, Karnataka
Percentile: 84.167%

SKILLS

Technical Skills	Java, Python, C, SQL and Machine Learning.
Soft Skills	Problem-solving, Teamwork, Adaptability and Communication.
Web Development	HTML, and CSS.
Tools	GIT, GitHub, BitBucket, JIRA.

EXPERIENCE

Research Intern Feb 2024 - Jul 2024
PESU-ISFCR *Bangalore, Karnataka*

- Developed an robust Intrusion Detection System using deep learning models.
- Achieved 95% and 98% accuracy on two publicly available datasets.
- Attempted deployment of the Intrusion Detection System on Open-Stack infrastructure.

Software Engineer Aug 2024 - present
Mphasis *Hyderabad, Telangana*

- Refactored code in UserGUI, improving maintainability and performance.
- Extracted specific functionalities from an existing module and integrated them into a newly created, standalone module.
- Enhanced modularity and reusability, ensuring a cleaner and more structured codebase.

PROJECTS

Project Name	Feelspeak - Generating Emotional Speech with Deep Learning
Organization	PES University
Duration	August 2023 – March 2024
Environment	Python, Google Colab, Kaggle
Role	Developer

Description : Built a efficient tool to generate emotional speech from normal text by using two deep learning models(BERT/ROBERTA Hugging face model and Tacotron model). The tacotron model’s performance is then evaluated by the vokaturi tool.

Responsibilities:

- Developed an emotion extraction model using RoBERTa and BERT.
- Managed data gathering, processing, and transmission.
- Tagged text with emotional context for improved accuracy.
- Built a Streamlit app to interface with the synthesis pipeline.
- Contributed to writing and publishing a research paper in IEEE.

Project Name	E-Commerce Application
Organization	Mphasis ltd
Duration	September 2024 – October 2024
Environment	Java, Spring Boot, JPA Repository, SQL, Swagger API
Role	Software Developer

Description: Developed a Spring Boot-based E-Commerce Application with well-structured Controller, Service, and Repository layers. Integrated JPA Repository for efficient database operations and used SQL for data persistence. Implemented Swagger API for documenting and testing RESTful services, ensuring smooth API interactions.

Responsibilities:

- Designed and implemented RESTful APIs using Spring Boot controllers for handling user requests.
- Utilized JPA Repository for database interactions, improving efficiency and performance.
- Developed and managed Entity classes for database mapping and business logic implementation.
- Integrated Swagger API to document and test endpoints, enhancing API usability and accessibility.
- Optimized application structure for better maintainability, modularity, and scalability.

PUBLICATION

- ”PyEdit Pro: The Ultimate Advanced Text Editor in Python - Empowering Text Editing Experience”, 2023 1st International Conference on Multidisciplinary Research in Technology and Management.
- ”SentientSoundwaves: Elevating Emotional Communication with AI-Generated Speech Technology”, 2024 5th International Conference of Emerging Technologies.

CERTIFICATION

- Introduction to Cloud 101, issued by AWS Educate. [Verify here](#).
- Introduction to Cybersecurity, issued by Cisco. [Verify here](#)
- LFD103: A Beginner’s Guide to Linux Kernel Development, issued by The Linux Foundation. [Verify here](#)
